SafetyPort

HELPING CONNECT BEDSIDE PRACTICE TO LEADERSHIP STRATEGY TO HELP REDUCE THE RISKS OF CLINICAL PRACTICE VARIATIONS

Being a caregiver is rewarding and challenging at the same time given the amount of multi-tasking that is required. We understand this and are here to assist the caregivers with their workflow by providing LINIS SafetyPort - a solution for automated export of data from LINET beds (e.g. safe position of the bed, bed exit alarm, patient weight).

NURSES
– 24/7 data overview of all the beds
– Data evaluation of patient mobilization
– Data to help reduce and manage pressure ulcers

MANAGEMENT
– Overview of bed features utilization
– Actionable data aggregated in graphs and charts
– Detailed overview of clinical practice at your facility

SERVICE & MAINTENANCE
– Real time data about the bed usage
– Complete history of error codes
– Bed localization in a hospital

PATIENT SAFETY

16 data points:
– controlling patient's weight and presence
– monitoring safety position of the bed

RESPIRATORY & MOBILIZATION

12 data points:
– improving mobilization practices
– preventing pressure injuries

BED MANAGEMENT

7 data points:
– monitoring location of bed and important maintenance data
– providing overview of its equipment

UTILIZATION

4 data points:
– providing hospital with actionable data overview of bed features
